The Highmark Blue Shield Office Manual contains information, policies, and procedures that apply to Highmark network participating providers in Pennsylvania (PA), Delaware (DE), West Virginia (WV), and contiguous counties. The symbols below are used in the manual to identify information that is specific to one state. In some instances, information may be designated as applicable to only two states. Where no symbol is present, the information is relevant to all states.

- **PA** symbol indicates the information in the section is applicable to providers participating in Highmark networks in Pennsylvania and contiguous counties.
- **DE** symbol indicates the information in the section is applicable to providers participating in Highmark networks in Delaware and contiguous counties.
- **WV** symbol indicates the information in the section is applicable to providers participating in Highmark networks in West Virginia and contiguous counties.
6.4 RADIOLOGY MANAGEMENT PROGRAM OVERVIEW

Introduction

Highmark’s Radiology Management Program is designed to improve the quality and appropriateness of outpatient advanced imaging services delivered to our members. With the expansion of imaging technology, increasing concern over the levels of radiation exposure, and spiraling health care costs, radiology utilization management programs are common.

The Highmark Radiology Management Program consists of two components: privileging diagnostic imaging providers and prior authorization of select procedures. The privileging process helps to ensure that outpatient imaging services are being performed by qualified providers who demonstrate competency in administration of these services, thus improving quality and safety to our members. The prior authorization process ensures that select outpatient advanced diagnostic imaging services are used only when they are clinically appropriate. The program components are discussed in more detail in the next two sections of this unit.

This program applies to all Highmark products, except indemnity products.

National Imaging Associates (NIA)

Highmark retains the services of National Imaging Associates, Inc. (NIA), a wholly-owned subsidiary of Magellan Health Services, to assist with the Radiology Management Program. NIA pioneered the radiology benefits management industry and has long-standing experience grounded in clinical research, innovative technology, and proven results. NIA is URAC accredited, NCQA certified in utilization management, and is compliant with all state regulations applicable to their services.

FOCUS Program in Delaware

Highmark Delaware uses the FOCUS Tool through Medicalis to ensure single-photon emission computed tomography (SPECT) myocardial perfusion imaging (MPI) tests meet appropriate use criteria standards.

Participating cardiology and radiology practices in Delaware are responsible for entering information about patients for whom an outpatient SPECT MPI test is considered/ordered. FOCUS will generate a decision support number for each case entered and send this information to Highmark Delaware to support payment of a claim.

For additional information about the FOCUS Program in Delaware, please see the applicable section in this unit.
6.4 PRIVILEGING FOR RADIOLOGY SERVICES

What is privileging?

Privileging is a process that assesses the quality of imaging services performed at an imaging center or in a physician’s office. All professional providers who perform imaging services must be privileged. Non-privileged providers are not eligible for reimbursement of imaging services.

Privileging Requirements

Highmark’s privileging requirements are intended to promote reasonable and consistent quality and safety standards for the provision of imaging services. The Highmark Radiology Management Program Privileging Requirements can be accessed from the Highmark Radiology Management Program page on the Provider Resource Centers via NaviNet® or Highmark’s public websites.

Highmark will not reimburse providers for imaging services performed for Highmark members if they do not satisfy the privileging requirements. Any denied services will not be billable to the member.

How to become a privileged provider

Any contracted professional provider who performs diagnostic imaging services can apply to become a privileged provider. The online Highmark Radiology Management Program Privileging Application must be completed. A separate privileging application is required for each practice location where diagnostic imaging services are performed as well as for each billing methodology used (global, professional, technical).

To obtain a login for the application, you will need to contact National Imaging Associates, Inc. (NIA) by calling 1-888-972-9642 or by sending an email to RADPrivilege@Magellanhealth.com. NIA will need the following information in order to assign a login:

- Provider name
- Address of diagnostic imaging location
- Tax identification number

Once you obtain your login/MIS number from NIA, you can access the Highmark Radiology Management Program from the Provider Resource Center. From the main menu, select Highmark Radiology Management Program, and then click on Privileging Application and Requirements. Scroll down the page to the link for the Highmark Radiology Application.

For questions regarding the application, contact NIA at 1-888-972-9642.

Continued on next page
6.4 PRIVILEGING FOR RADIOLOGY SERVICES, Continued

How to become a privileged provider (continued)

**Note:** A separate login and privileging application will be required for each practice location, each modality, and if more than one billing methodology is used (global, professional or technical).

Providers must complete an application for each addition or expansion of services and also when adding additional sites. Practitioners will not be reimbursed for services provided on transferred or new equipment without being privileged.
6.4 PRIOR AUTHORIZATION FOR DIAGNOSTIC IMAGING SERVICES

Overview

Under the Highmark Radiology Management Program, prior authorization is intended to ensure quality and proper use of diagnostic imaging consistent with clinical guidelines. Providers are required to use NaviNet® to request authorizations from National Imaging Associates, Inc. (NIA) prior to ordering any services on the program’s list of procedures requiring authorization.

Using Highmark medical policy and nationally accepted clinical criteria, Highmark and NIA work closely with imaging providers and ordering physicians. This is to ensure our members receive the most appropriate imaging tests, avoid the inconvenience and expense of unnecessary and/or duplicate services, and reduce their exposure to unnecessary radiation. NIA will issue authorization numbers that will be required for reimbursement. Denials may be issued based on medical necessity and/or appropriateness determinations.

Verifying eligibility and benefits

Highmark’s Radiology Management Program applies to members enrolled in most Highmark health plans; however, some employer groups may choose to opt out of the program. Prior to ordering or performing any procedures included in the program, providers should always verify the member’s eligibility and benefits.

You can determine if a member’s benefit plan requires prior authorization on the Eligibility and Benefits Details screen in NaviNet. In the “Group Information” section, the Advanced Imaging UM by NIA indicator will show “YES” if the Radiology Management Program applies to the member’s plan and prior authorization is required:

Continued on next page
6.4 PRIOR AUTHORIZATION FOR DIAGNOSTIC IMAGING SERVICES, Continued

Requesting authorization

The ordering physician’s office should use NaviNet’s Authorization Submission transaction to submit an authorization request to NIA before scheduling the test. NaviNet is the preferred method of submitting NIA authorization requests.

Providers who are not NaviNet-enabled should call the NIA Call Center, which can be reached by calling your Highmark Provider Service line:

- PA Central and Northeastern Regions: 1-866-731-8080
- PA Western Region: 1-800-547-3627
- Delaware: 1-800-424-5655
- West Virginia: 1-800-344-5245

Listen carefully to the options and select the option for requesting authorization for advanced imaging. NIA Call Center hours are from 8 a.m. to 8 p.m. EST, Monday through Friday. Saturday hours are from 8 a.m. to 1 p.m. EST. If necessary, NIA can be contacted directly at 1-888-972-9642.

Services that require prior authorization

The prior authorization process applies only to certain outpatient, non-emergent advanced diagnostic imaging services. The prior authorization process does not apply to imaging services ordered in an emergency room, urgent care centers, ambulatory surgery centers, or during inpatient or observation stays.

Prior authorization applies to selected procedures of the following types of imaging tests:

- Computed tomography (CT);
- Magnetic resonance imaging (MRI);
- Magnetic resonance angiography (MRA);
- Positron emission tomography (PET);
- Myocardial perfusion imaging (MPI) scans; *
- Stress echocardiography.**

*Prior authorization for MPI scans is required for Highmark Delaware providers not participating in FOCUS.

** Effective with dates of service on or after October 3, 2016, requirements for stress echocardiography under the program changed from prior notification to prior authorization. Please note, however, that stress echocardiography will continue to require prior notification for certain self-funded employer groups.

Continued on next page
6.4 PRIOR AUTHORIZATION FOR DIAGNOSTIC IMAGING SERVICES, Continued

Procedures requiring authorization

To access the most current list of specific procedure codes that require authorization, select Highmark Radiology Management Program from the main menu on the Provider Resource Center. And then follow the applicable instructions for your region:

- In Pennsylvania, select the link titled Prior Authorization/Notification Information; the list is available in the Prior Authorization Guide.
- In Delaware, select Program Information, and then Claims Matrix.
- In West Virginia, select Program Information, and then Claim Resolution Matrix.

Note: For procedure codes in these categories that are not on the list requiring prior authorization, please refer to Highmark Medical Policy for clinical guidelines to determine coverage based on medical necessity. You can access Highmark’s Medical Policy website through Chapter 6, Unit 2 of the Highmark Blue Shield Office Manual.

Clinical Validation of Records (CVR)

Effective October 3, 2016, NIA implemented a Clinical Validation of Records (CVR) process for all codes that are part of Highmark’s Radiology Management Program. As part of the prior authorization process, NIA will request and review clinical documentation from the member’s medical record to help ensure Highmark members receive the most appropriate and effective care.

If your authorization request is pended for additional clinical information, you will immediately receive a fax specifying clinical documentation from the member’s medical record that is needed for review. Providers must fax the requested information to NIA before a final determination can be made.

NIA will validate the clinical criteria within the patient’s medical records, ensuring that the clinical criteria support the requested procedure and are clearly documented in the medical records. All reviews are processed under NCQA and regulatory guidelines. Urgent requests can continue to be called into NIA and clinical validation will not be required under those circumstances.

Continued on next page
6.4 PRIOR AUTHORIZATION FOR DIAGNOSTIC IMAGING SERVICES, Continued

Authorization is not a guarantee of payment

When an authorization number is provided, it serves as a statement about medical necessity and appropriateness; it is **not a guarantee of payment**. Payment is dependent upon the member having coverage at the time the service is rendered and the type of coverage available under the member’s benefit plan.

It is the provider’s responsibility to verify that the member’s benefit plan provides the appropriate benefits for the anticipated date of service prior to rendering the service. Highmark recommends that providers confirm a member’s eligibility on either the anticipated date of service or one business day prior to the anticipated date of service. Some benefit plans may also impose deductibles, coinsurance, copayments, and/or maximums that may impact the payment. Providers may consult NaviNet to obtain benefit information.

**Note:** Authorization numbers do not need to be entered on a claim. However, Highmark strongly recommends that the provider performing the diagnostic test documents and archives the imaging authorization number in the event it is needed for future reference.

For more detailed information on the components of the Highmark Radiology Management Program, please refer to the documents available on the Provider Resource Center. Select the **Highmark Radiology Management Program** link from the main menu on the left.
6.4 FOCUS PROGRAM FOR CARDIAC IMAGING PROCEDURES - DELAWARE ONLY

Overview

FOCUS is a decision support tool developed in partnership with the American College of Cardiology (ACC) and the American College of Cardiology Foundation (ACCF). The FOCUS tool helps track and educate providers on the appropriate use of cardiac imaging procedures, providing cardiologists and radiologists with feedback to help them follow current guidelines and meet the Appropriate Use Criteria standards.

Requests

Highmark Delaware participating cardiology and radiology practices with locations in Delaware are required to enter data into FOCUS when ordering or considering outpatient SPECT MPI tests for all managed care business. This includes the following CPT codes: 78451 and 78452. The request must be entered by the practice performing the test – whether the request is generated by that practice or a referring physician.

Practices will need the following clinical information to complete the FOCUS tool:

- Blood pressure
- Co-morbidities
- Current medications
- Current symptoms
- Potential risk factors (e.g., nicotine use)
- Prior related tests (if any)
- Prior related surgeries
- Total cholesterol and HDL levels

The decision support tool will provide the information to the provider requesting the service indicating the appropriateness of the service based on the clinical information supplied. The provider will be able to make a choice as to ordering the test; no denials are issued.

Once the FOCUS tool is completed, a decision support number (DSN) is generated for each case entered and the information is sent to Highmark Delaware to support claim payment; if the tool is not completed, the claim will deny.

As a part of this program, providers will receive reports on patterns of use over time and agree to participate in improvement and educational sessions as necessary.

If you need assistance with the FOCUS tool, please contact the ACC by telephone at 1-800-253-4636, or email focus@acc.org.
6.4 REPORTING METHODS

Inpatient vs. outpatient

When you submit claims to Highmark for diagnostic or therapeutic radiology services or diagnostic medical services provided to hospital inpatients or outpatients, you must report the place of service as inpatient hospital or outpatient hospital, as appropriate. In these cases, you will be reimbursed only the professional component of the service.

- **Inpatient** – a patient who is an inpatient of a facility, such as a hospital or skilled nursing facility, at the time the procedure is performed. When an inpatient is taken outside the hospital setting, such as to a physician’s office, and is then returned to the hospital, the physician must report services according to the patient’s status, in this case, inpatient. Therefore, you must report only “inpatient” as the place of service, rather than the place, such as “office” or “outpatient hospital,” where the service actually was performed.

- **Outpatient** – a patient, other than an inpatient, who is treated in a hospital, on hospital grounds, or in a hospital-owned or controlled satellite, when it has been determined that the satellite is an outpatient department of the hospital. This definition does not apply when a treating physician’s sole practice is located in a hospital or hospital owned building, if the practice is not affiliated or controlled, in any way, by the hospital or a related entity; or, if the practice has been approved to be recognized as an office practice.

For example, if a mobile ultrasound, MRI, or CT unit locates on hospital grounds one day each week, all services provided to patients on that day must be reported with inpatient or outpatient, but not office, as the place of service.
6.4 LABORATORY MANAGEMENT PROGRAM

Overview
Highmark has partnered with eviCore healthcare ("eviCore") to ensure our members are receiving the most clinically appropriate genetic laboratory testing. eviCore has a team of genetic counselors and medical geneticists with national experience in genetic testing utilization management using evidence-based policies developed with trained genetic experts.

Under Highmark's Laboratory Management Program, eviCore will perform medical necessity reviews for select molecular and genomic tests performed in an outpatient setting. In addition, all claims associated with molecular and genetic procedure codes will be reviewed for accuracy and medical necessity, based on eviCore’s policies.

Procedures requiring authorization
Effective for dates of service beginning August 1, 2016, prior authorization is required for certain outpatient, non-emergent molecular and genomic testing, such as:
- Hereditary cancer screening
- Carrier screening
- Tumor marker/molecular profiling
- Hereditary cardiac disorders testing
- Cardiovascular disease and thrombosis risk variant testing
- Pharmacogenomics testing
- Neurologic disorders testing
- Mitochondrial disease testing
- Intellectual disability/developmental disorders testing

The Prior Authorization Procedure Code List is a complete list of impacted procedure codes. This list can also be accessed from the Provider Resource Center: select Clinical Reference Materials, and then Laboratory Management Program. The link for the list is available under Reference Materials.

Any services performed without prior authorization may be denied, and providers may not seek reimbursement from members.

Exclusions
Prior authorization is not required for the following:
- Inpatient genetic testing;
- General lab testing; or
- Genetic testing for CPT codes not included on eviCore’s prior authorization list.

Continued on next page
6.4 LABORATORY MANAGEMENT PROGRAM, Continued

Applicable products
Highmark’s Laboratory Management Program applies to Highmark members with fully-insured commercial, Affordable Care Act (ACA), and Medicare Advantage products.

The program is not applicable to traditional indemnity products, ASO (Administrative Services Only) accounts, National accounts, the Federal Employee Program (FEP), and BlueCard.

If you are uncertain whether a member’s benefits require authorization for genetic testing under the Laboratory Management Program, you can call eviCore at 1-888-564-5492 for confirmation of prior authorization requirements for the member.

Requesting authorizations
Highmark recommends that ordering physicians secure authorizations and pass the authorization numbers to rendering facilities at the time of scheduling. Authorizations contain authorization numbers and one or more CPT codes specific to the services authorized. If the service requested is different from what is authorized, contact eviCore for review.

NaviNet-enabled providers should use the NaviNet Authorization Submission transaction to submit authorization requests. If you attempt to submit a request and receive a message to call eviCore, authorization may not be required under the member’s benefit plan; the eviCore representative will assist in identifying the member and determining if authorization is needed.

If you are not NaviNet-enabled for authorization submission, you may use the eviCore Web Portal, available 24/7 at evicore.com, to request authorizations.

Authorizations are valid for sixty (60) days. If the approved procedure is not completed by the Last Assigned Covered Day, a new request must be submitted.

Urgent requests
If services are required in less than forty-eight (48) hours due to medically urgent conditions, please call eviCore at 1-888-564-5492 for authorization. Be sure to tell the representative that the authorization is for medically urgent care.

eviCore will make every effort to render a decision within one (1) business day of receipt of all necessary information.

Continued on next page
6.4 LABORATORY MANAGEMENT PROGRAM, Continued

Claim submission & reimbursement
Claims are submitted to Highmark following normal claim submission procedures, and you will receive reimbursement for eligible services from Highmark.

Claims review requirements
Beginning August 1, 2016, all claims associated with molecular and genomic procedure codes will be reviewed prior to payment for accuracy and medical necessity, based on eviCore’s policies, and matched against the authorization, if applicable.

This review is not limited to those codes for which authorization is required. The Claims Review Procedure Code List identifies the codes subject to claims review as part of the Laboratory Management Program. The list is also available on the Laboratory Management Program page on the Provider Resource Center.

FOR MORE INFORMATION
For complete program information, please see the Laboratory Management Program page on the Provider Resource Center – select Clinical Reference Materials, and then click on Laboratory Management Program.

Information for Highmark’s Laboratory Management Program is also available on eviCore’s Resources page for providers, under Online Forms & Resource.
6.4 SPECIAL PROGRAMS IN PENNSYLVANIA’S LUZERNE AND LACKAWANNA COUNTIES

Introduction

Highmark recognizes the need to address regional community needs while maintaining provider network continuity and balance. The goal is to meet the needs of members through innovative programming within the network.

For members with HMO plans serviced by providers in the First Priority Health (FPH) network in Pennsylvania’s Luzerne and Lackawanna counties, special programs for outpatient laboratory and radiology services meet their needs for access to high quality, cost-effective services.

For all other counties in the 13-county Northeastern Region service area, radiology and laboratory services for members with HMO plans serviced by the FPH provider network can be performed at any participating facility with a script from the ordering physician.

Outpatient Laboratory Program

The outpatient laboratory program with Commonwealth Health Laboratory Services is for members whose FPH network primary care physician (PCP) is located within Lackawanna or Luzerne counties. Care must be coordinated with the member’s FPH network PCP. The member needs only to take a physician’s orders to a Commonwealth Health Laboratory for services.

Services included in this program are:

- Pre-admission testing;
- House calls; and
- Services associated with skilled nursing/personal care facilities.

Please see the Commonwealth Health Laboratory Services listing of laboratory sites, which includes addresses, hours, and telephone and fax numbers. This list is also available on the Highmark Blue Shield Provider Resource Center – select Administrative Reference Materials, and then click on First Priority Health Network Resources.

Outpatient Radiology Program

For members with HMO coverage whose FPH network PCP is located within Luzerne County (excluding the Berwick and Hazelton areas), an outpatient radiology program provided in conjunction with Wilkes-Barre General Hospital renders integrated, high quality, and cost-effective care.

Care must be coordinated with the member’s FPH network PCP. The member needs only to take a physician’s orders to Wilkes-Barre General Hospital or one of its affiliated sites for services. For site locations, hours, and telephone numbers, please see

Continued on next page
6.4 SPECIAL PROGRAMS IN PENNSYLVANIA’S LUZERNE AND LACKAWANNA COUNTIES, Continued

Outpatient Radiology Program (continued)

the Wilkes-Barre General Radiology Sites list. This list is also available on the Highmark Blue Shield Provider Resource Center – select Administrative Reference Materials, and then click on First Priority Health Network Resources.

Services for members in the remaining Luzerne County region can be obtained from any participating hospital facility.

Magnetic resonance imaging (MRI), magnetic resonance angiography (MRA), and positron emission tomography (PET) scans are excluded from the capitated radiology program; however, they do require prior authorization. For a complete listing of radiology procedures that require authorization, please refer to the Wilkes-Barre General Radiology Sites list.
6.4 COST SHARING ON OUTPATIENT DIAGNOSTIC SERVICES

Overview

Highmark offers optional benefit designs that include cost sharing provisions specific to outpatient diagnostic services.

Services affected

Cost sharing on outpatient diagnostic services will be applied to:

- Routine/preventive diagnostic services (with the exception of all mammograms and the annual routine Pap test), and
- Non-routine diagnostic services including pre-admission testing.

Impacted products

Products that may have a cost sharing benefit design include Exclusive Provider Organization (EPO) and Preferred Provider Organization (PPO) plans, including Medicare Advantage PPO.

Note: Cost sharing provisions will not be noted on Member ID cards. Please review member benefits accordingly through NaviNet® or by contacting Provider Service if you are not a NaviNet-enabled provider.

Five categories of outpatient diagnostic services

Continued on next page
6.4 COST SHARING ON OUTPATIENT DIAGNOSTIC SERVICES,
Continued

**How coinsurance is applied**

If a member has coinsurance, it is applied to all line items identified as outpatient diagnostic services either on Advanced Imaging only or also on the four categories of Basic Diagnostic Services depending on the benefit design selected.

The coinsurance amount (e.g., 80%) for the four categories of Basic Diagnostic Services is the same. Coinsurance for outpatient diagnostic services is applicable to the total component, technical component, and/or professional component only.

The member may be responsible for both a copayment and coinsurance when a service, such as an office visit or therapy service, and an outpatient diagnostic service are performed on the same date of service.

**How copayments are applied**

If a member has copayments on outpatient diagnostic services, they are applied per date of service and per type of diagnostic service. If services fall in more than one of the five diagnostic service categories (see previous page), multiple copayments can be applied. Please review the member’s benefit program to determine if a copayment is owed on multiple services.

**Please Note:** For Medicare Advantage Freedom Blue PPO, copayments are applied per date of service, per type of diagnostic service, and also per provider.

Copayments may be applicable to only the advanced imaging services or also to all four categories of basic diagnostic services. The copayment amount for the advanced imaging services would usually be a higher amount (e.g., $100). The copayment amount for the four categories of basic diagnostic services is the same (e.g., $25 for each type of service).

Copayments are applied to the total component or technical component claims for outpatient diagnostic services. Copayments are not applied to professional component only claims (26 modifier).

*Continued on next page*
Examples of multiple copayments and/or coinsurance

- If a PPO member sees his cardiologist and receives an EKG during the visit, he would be responsible for two copayments: an office visit copayment and an outpatient diagnostic service copayment for the EKG (diagnostic medical service).
- If a PPO member receives an MRI (advanced imaging service), then has a spinal X-ray (standard imaging service) and lab work (laboratory/pathology service) on the same day – all as outpatient services – she would be responsible for three outpatient diagnostic copayments.
- If an EPO member sees his cardiologist and receives a regular treadmill stress test (basic diagnostic medical service) while there, he would pay an office visit copayment, and then would be responsible for any applicable coinsurance when the stress test claim is processed.
- If a Medicare Advantage Freedom Blue PPO member sees his cardiologist and receives an EKG (basic diagnostic medical service) while there and on the same day goes to another physician and receives a regular treadmill stress test (also a basic diagnostic medical service), he would be responsible for two copayments, one for each provider.

Cost sharing exceptions

- All mammograms (routine and medically necessary) and the annual routine Pap tests are generally unaffected by the cost sharing benefit designs.
- Diagnostic services performed in conjunction with an emergency room visit would not be impacted in most cases.
- There may be situations where cost sharing may apply in the above situations, especially for self-insured employer groups. Please be sure to review each service on a case-by-case basis.

Determining if members have cost sharing

More information on outpatient radiology and other diagnostic services cost sharing can be easily accessed through NaviNet, or by contacting Provider Service if you are not a NaviNet-enabled provider.

Log on to NaviNet and follow these steps:
1. Select **Eligibility and Benefits Inquiry** for a specific patient, and then
2. Select **Outpatient Facility Services**.
3. Scroll to the bottom of the benefits page to find any applicable copayment and coinsurance information under **Outpatient Diagnostic Services**.
6.4 OUTPATIENT LABORATORY OVERVIEW

Introduction
Providers must refer members to participating laboratory vendors when lab services are needed and are not performed in the provider’s office.

Prescription necessary
PCPs and specialists need only give their members a prescription for the necessary lab tests and direct them to a network-participating lab.

Communication between the PCP and specialist
Specialty practitioners should communicate with a member’s PCP after a consultation visit so that laboratory services can be appropriately coordinated.

Pass-through billing not permitted
Pass-through billing occurs when ordering practitioners bill for clinical laboratory tests that were not performed in their offices. Highmark does not permit pass-through billing.

Practitioners should bill only for the component of the laboratory service they perform in their offices. Independent laboratories should bill for any clinical lab tests referred to them by practitioners.

Highmark will reimburse practitioners for drawing or handling when the specimen is sent to a laboratory other than the practitioner’s office lab and the clinical lab test is billed by the independent laboratory. However, if the clinical lab test is performed in the practitioner’s office and the practitioner bills for the test, an additional charge for drawing or handling will not be reimbursed. The handling or drawing of the specimen is considered part of the laboratory procedure.

Continued on next page
6.4 OUTPATIENT LABORATORY OVERVIEW, Continued

Network-participating hospitals provide outpatient lab services. In addition, there are several freestanding labs and specialty labs that are designated outpatient lab providers. NaviNet® is the fastest method for accessing real-time lists of network participating providers.

<table>
<thead>
<tr>
