MORE ADVANCED IMAGING AND CARDIOLOGY SERVICES PROGRAM REFERENCE MATERIALS NOW AVAILABLE

If you're looking for information about submitting your prior authorization requests for advanced imaging or cardiology services, you can rely on the Advanced Imaging and Cardiology Services Program page on Highmark's Provider Resource Center. There you'll find Frequently Asked Questions, a Quick Reference Guide, a list of procedures that require prior authorization through the new program, and more.

Highmark has added four new reference materials to the Advanced Imaging and Cardiology Services Program page to provide you with even more information and to help you save time. These new reference lists are now available under **Educational Materials/Communications**:

- Allowable Billed Groupings
- CPT Code List by Category and Service Type
- CPT Codes That Can Be Ordered in the Same Prior Authorization
- Nuclear Medicine New CPT Code List

The Nuclear Medicine New CPT Code List contains 85 new procedures that do not include a specific imaging category in NaviNet[®]. When you order a procedure that is on this list, please select any service type and any of the following appropriate imaging categories when entering your prior authorization request in NaviNet:

- CT angiography
- CT scan
- MRA
- MRI
- PET scan
- Nuclear cardiology

You can find the Advanced Imaging and Cardiology Services Program page on the Provider Resource Center under the **Care Management Programs** option.
