

Capturing Osteoporosis prescriptions via supplemental data

The Osteoporosis Management measure is the percentage of women ages 67–85 who have suffered a fracture during the measurement year. Compliance for the measure is based on women who have had either a bone mineral density (BMD) test or a prescription for a drug to treat or prevent osteoporosis in the six months after the fracture. Additional information on the specifics of the measure can be found within the Highmark Medicare Advantage Primary Care Incentive Program Measure Guide.

Patients who were taking a medication to treat osteoporosis or received a BMD test during the twelve months prior to the fracture can be excluded from this measure.

If your patient is actively taking an osteoporosis medication and has used their Highmark benefits at the dispensing pharmacy, they will be considered compliant for the measure due to a claim being generated. **If your patient is not using their Highmark insurance, documentation should be submitted via the Clinical Quality Feedback Loop to receive credit.**

Use the Clinical Quality Feedback function if your patient was taking one of the medications below in the 12 months prior to the fracture or within 6 months after the fracture, but received the medication via:

- VA
- Patient Assistance Programs
- Samples
- Retail Pharmacy Programs (such as \$4 generics)
- Pharmacy Discount Cards
- Paying Cash

Medications*

Abaloparatide (Tymlos)	Denosumab (Xgeva)	Risedronate-Calcium Carbonate (Actonel with Calcium)
Alendronate (Binosto)	Ibandronate (Boniva)	Romozosumab-aqqg (Evenity)
Alendronate (Fosamax)	Raloxifene (Evista)	Teriparatide (Forteo)
Alendronate-Cholecalciferol (Fosamax Plus D)	Risedronate (Actonel)	Zoledronic acid (Reclast)
Denosumab (Prolia)	Risedronate (Atelvia)	Zoledronic acid (Zometa)

The Clinical Quality Feedback function is accessible via NaviNet®. Documentation that the patient received an osteoporosis medication must include the following:

- Generic name of the medication
- Strength/dose
- Route of administration
- Date the patient received the medication
- Quantity (required for samples only)
- Lot number (required for samples only)
- Expiration date (required for samples only)

For additional information on how to submit supplemental data, including how to submit BMD tests, please refer to the **Clinical Quality Feedback Supplemental Guide** located on the Provider Resource Center or the Quality Blue User Interface
