## NOTICE OF CHANGE TO QUANTITY LEVEL LIMITS ON PRESCRIPTION DRUGS

### Prescription Drug Quantity Level Limit Enhancements for Commercial and Healthcare Reform Members

Highmark continually works to enhance its systems to allow for more flexible and new drug coverage products for our customers. On November 1st, 2017, certain System enhancements will go into effect. As part of these enhancements, drugs that are part of the Prescription Drug Quantity per Copay (QPC) benefit are undergoing a processing change which will make the dispensing of drugs with a QPC stricter for claims that are processed with a retail day supply (ie 34 days or less). Starting November 1st, 2017 if a Commercial or Healthcare Reform member is obtaining select medications which are part of the QPC benefit, they will be limited to receiving the retail limit for claims submitted with a day supply of 34 or less, but will be able to get up to the mail limit for claims submitted with a day supply greater than 34 days. Drugs that may be impacted by this change are listed below with additional details regarding their specific quantity level limits.

Please note, the actual quantity limit is not changing for any of these products, so impact is minimal.

Drug Name	Retail Limit (Claims with Day Supply of 34 Days or Less)	Mail Limit (Claims with Day Supply of Greater than 34 Days)
ACTONEL 30 MG	4 Tablets	12 Tablets
ACTONEL 150 MG	1 Tablet	3 Tablets
