

Every year,
about
4,000

women die in
the U.S. from
cervical cancer.*

Over 21?
It's time for a
screening.

This is intended to provide general information only and is not intended to be a substitute for professional medical advice, diagnosis, or treatment. Always seek the advice of your physician or other qualified health provider regarding your medical condition(s). Coverage for medical services described herein is subject to the terms of your health plan benefit agreement and network coverage varies by plan. Check your member materials for details.

Benefits and/or benefit administration may be provided by or through the following entities, which are independent licensees of the Blue Cross Blue Shield Association:

Western and Northeastern PA: Highmark Inc. d/b/a Highmark Blue Cross Blue Shield, Highmark Choice Company, Highmark Health Insurance Company, Highmark Coverage Advantage Inc., Highmark Benefits Group Inc., First Priority Health, First Priority Life or Highmark Senior Health Company. **Your plan may not cover all your health care expenses. Read your plan materials carefully to determine which health care services are covered. For more information, call the number on the back of your member ID card or, if not a member, call 866-459-4418.**

Delaware: Highmark BCBSD Inc. d/b/a Highmark Blue Cross Blue Shield.
West Virginia: Highmark West Virginia Inc. d/b/a Highmark Blue Cross Blue Shield, Highmark Health Insurance Company or Highmark Senior Solutions Company. Visit <https://www.highmarkbcbswv.com/>

Network Access Plan to view the Access Plan required by the Health Benefit Plan Network Access and Adequacy Act. You may also request a copy by contacting us at the number on the back of your ID card.

Western NY: Highmark Western and Northeastern New York Inc. d/b/a Highmark Blue Cross Blue Shield.

Highmark Blue Cross Blue Shield is a Medicare Advantage HMO, PPO, and/or Part D plan with a Medicare contract. Enrollment in these plans depends on contract renewal.

All references to "Highmark" in this document are references to the Highmark company that is providing the member's health benefits or health benefit administration and/or to one or more of its affiliated Blue companies.

The Claims Administrator/Insurer complies with applicable Federal civil rights laws and does not discriminate on the basis of race, color, national origin, age, disability, or sex.

Cervical cancer
Are you at risk?
Find out.

HIGHMARK 
Because Life.™

You can have cancer and not know it

Cervical cancer is a slow-growing cancer that develops in the cervix, the lower section of a woman's uterus. Each year, around 13,000 new cases of cervical cancer are diagnosed.

Cervical cancer can be caused by a human papillomavirus (HPV) infection and can be spread among men and women.

You can help prevent cervical cancer

Talk to your doctor or health care provider about receiving an HPV vaccine. Then get regular HPV screenings to catch any changes before these cells have a chance to turn into cancer.

- The HPV vaccine is for both males and females ages 9–26 and ages 27–45 for those at-risk per doctor's advice.
- This vaccine can help protect you against some types of HPV infections.

You can reduce your risk

One way to reduce your risk is to get the HPV vaccine.

You are at GREATER risk if you use the pill (oral birth control), have a weak immune system, or have had chlamydia.

You can REDUCE your risk if you don't smoke cigarettes, limit your sexual relationships, use condoms, and avoid partners who have sexually transmitted diseases.

Get screened before you get cancer

If you are 21 or older,* ask your OB-GYN or health care provider about screening tests that can find potential problems early.

PAP TEST

- Doctors view cells from the cervix and vagina under a microscope
- Every three years starting at age 21* or yearly per your doctor's advice

HPV TEST

- Tests the cervical cells
- Every five years — starting at age 30,* with or without a Pap test

These are general guidelines. Talk to your health care provider and follow their recommendations.

*Sources: CDC, USPSTF

Don't forget to follow up

You may need follow-up tests if you have:

- Abnormal results on your Pap test.
- Unexplained vaginal bleeding or pelvic pain.

Questions?

Every plan is a little different, so if you have questions, just call the number on the back of your member ID card and we can help.
