Already included in Preventive Health Guidelines	Screening and Counseling for Interpersonal and Domestic Violence	Integral to the physical exam
8/1/2012	**Contraceptive and Sterilization Services	<p>Food and Drug Administration (FDA) approved contraceptive methods, including sterilization and procedures as prescribed.</p> <p>NYS: Provides coverage for contraceptive drugs, devices, and other products, including over-the-counter contraceptive drugs, devices, and other products, approved by the FDA, and as prescribed or otherwise authorized under State or Federal law. "Over-the-counter contraceptive products" means those products provided for in comprehensive guidelines supported by HRSA. Coverage also includes emergency contraception when provided pursuant to a prescription or order or when lawfully provided over-the-counter. The insured may request coverage for an alternative version of a contraceptive drug, device, and other product if the covered contraceptive drug, device, and other product is not available or is deemed medically inadvisable, as determined by the insured's attending health care provider. For groups that meet the definition of a religious employer in §§ 3221(l)(16)(E) and 4303(cc)(5)(A), the subscriber will have the option to purchase the stand-alone contraceptive coverage rider.</p> <p>Such coverage shall not be subject to deductibles, copayments and/or coinsurance. Coverage for contraceptive drugs, devices, and products is required even when prescription drugs are not otherwise covered under the policy or contract.</p>
1/1/2019	Postpartum Diabetes Screening	Recommends women with a 1) a history of gestational diabetes mellitus and 2) who are not currently pregnant and 3) who have not previously

Effective Date: Non-grandfathered Plan Year Renewals Beginning*	Guideline	Description
		<p>been diagnosed with type 2 diabetes mellitus should be screened for diabetes mellitus. Initial testing should ideally occur within the first year postpartum and can be conducted as early as 4–6 weeks postpartum. Women with a negative initial postpartum screening test result should be rescreened at least every 3 years for a minimum of 10 years after pregnancy. For women with a positive postpartum screening test result, testing to confirm the diagnosis of diabetes is indicated regardless of the initial test (e.g., oral glucose tolerance test, fasting plasma glucose, or hemoglobin A1c). Repeat testing is indicated in women who were screened with hemoglobin A1c in the first six months postpartum regardless of the result.</p> <p>Coding: no pregnancy diagnosis, no diabetes diagnosis: with diagnosis code Z86.32 or Z87.59: procedure codes 82947, 82950, 82951, 82952, 83036: frequency: 2 annually, no age limits.</p>
1/1/2019	Urinary Incontinence Screening	<p>Integral to the Well Women Visit</p> <p>Screening women for urinary incontinence annually. Screening should ideally assess whether women experience urinary incontinence and whether it impacts their activities and quality of life. The Women’s Preventive Services Initiative recommends referring women for further evaluation and treatment if indicated. Urinary incontinence is defined as involuntary leakage of urine, such as with coughing or sneezing.</p>
1/1/2021	Screening for Anxiety	<p>The Women’s Preventive Services Initiative recommends screening for anxiety in adolescent and adult women, including those who are pregnant</p>

Effective Date: Non-grandfathered Plan Year Renewals Beginning*	Guideline	Description
		or postpartum.
1.1.2023	Nutritional Counseling	Ages 40 - 60 years with normal BMI and overweight BMI for prevention of obesity in midlife women

*Grandfathered plans are health care plans that were established before March 23, 2010 and have not changed their benefit structure. Certain PPACA provisions differ or do not apply to these plans. However, grandfathered employers may opt to cover these benefits.

Providers should always check the NaviNet Eligibility and Benefits function or utilize the ASC X12 270/271 Eligibility Benefits Inquiry and Response transactions, each time a member presents for service.

**FDA-approved contraceptive methods may include sterilization and procedures as prescribed. One or more forms of contraception in each of the 18 FDA-approved methods, as well as any particular service or FDA approved, cleared or granted contraceptive product that an individual's provider determines is medically appropriate, are covered without cost sharing. Exception Process: Your provider may request an exception for use of a prescribed nonformulary contraception drug due to medical necessity by completing the online request form. When approved, the prescribed drug will then be made available to you with zero-dollar cost share. An initial 'Fail First' is not required, only provider determined medical necessity is needed when completing the exception form. The provider may note if there was a failed initial formulary drug, however it is not necessary for the formulary exception process for contraceptive drugs. [<https://hdebcbcs.highmarkprc.com/Forms/Pharmacy-Prior-Authorization-Forms>]. Only FDA approved contraception apps, which are not part of the 18 method categories, and are available for download to a cell phone are reimbursable through the paper claim process with a prescription. Members need to submit three documents to obtain reimbursement; 1) completed the paper Claim Form: [https://www.highmarkbcbs.com/redesign/pdfs/mhs/Medical_Claim_Form.pdf] Under section DIAGNOSIS OR NATURE OF ILLNESS OR INJURY – write "contraception app purchase" 2) receipt of payment for the FDA approved contraception app, 3) provider prescription for the FDA approved contraception app.
