# **Disclaimer**

Highmark Wholecare<sup>™</sup> medical policy is intended to serve only as a general reference resource regarding coverage for the services described. This policy does not constitute medical advice and is not intended to govern or otherwise influence medical decisions.

## **Policy Statement**

Highmark Wholecare<sup>™</sup> may provide coverage under the medical-surgical benefits of the Company's Medicare products for medically necessary Cardiac Event Detection Monitoring.

This policy is designed to address medical necessity guidelines that are appropriate for the majority of individuals with a particular disease, illness or condition. Each person's unique clinical circumstances warrant individual consideration, based upon review of applicable medical records.

## Procedures

- 1. Cardiac Event Detection involves the use of a long-term monitor by patients to document a suspected or paroxysmal dysrhythmia. Following the recording of events, the patient transmits data via telephone to a physician's office or a specified station that is equipped and staffed to assess electrocardiographic data and to initiate appropriate management action. The device must be patient-activated.
- 2. Please review the specific National Coverage Determination (NCD) and Local Coverage Determination (LCD) information, and/or Local Coverage Article (LCA), as well as other CMS sources, using the links below.

3. Post-payment Audit Statement

The medical record must include documentation that reflects the medical necessity criteria and is subject to audit by Highmark Wholecare<sup>™</sup> at any time pursuant to the terms of your provider agreement.

4. Place of Service

Please refer to the NCD, LCD, LCA or CMS guidelines for the place of service for cardiac event detection monitoring.

## Coverage Determination and Links

Highmark Wholecare<sup>™</sup> follows the coverage determinations made by CMS as outlined in either the NCD or the state-specific LCD and/or LCA.
