Disclaimer

Highmark WholecareSM medical policy is intended to serve only as a general reference resource regarding coverage for the services described. This policy does not constitute medical advice and is not intended to govern or otherwise influence medical decisions.

Policy Statement

Highmark WholecareSM may provide coverage under the medical-surgical (medical-surgical, DME, therapy etc.) benefits of the Company’s Medicaid products for medically necessary tests for rheumatic diseases.

This policy is designed to address medical necessity guidelines that are appropriate for the majority of individuals with a particular disease, illness or condition. Each person’s unique clinical circumstances warrant individual consideration, based upon review of applicable medical records.

(Current applicable Pennsylvania HealthChoices Agreement Section V. Program Requirements, B. Prior Authorization of Services, 1. General Prior Authorization Requirements.)

Definitions

Prior Authorization Review Panel (PARP) – A panel of representatives from within the PA Department of Human Services who have been assigned organizational responsibility for the review, approval and denial of all PH-MCO Prior Authorization policies and procedures.

Rheumatoid arthritis (RA) – a systemic autoimmune disease characterized by chronic joint inflammation that ultimately leads to joint destruction. Diagnosis of early disease is important. While the diagnosis of RA is established primarily on clinical criteria (physical examination and radiographic evaluation), laboratory testing for cyclic citrullinated peptide antibodies may contribute to early RA diagnosis.

Procedures

1. The measurement of anti-cyclic citrullinated peptide (anti-CCP) antibodies may be considered medically necessary for diagnosis of RA.
 - A. Autoantibody panels may be considered medically necessary when performed following confirmed ANA positivity or clinical suspicion that a rheumatologic disease is present in a child.
 - B. The myositis antibody panel may be considered medically necessary for diagnosing persons with inflammatory myopathy.

2. When selected tests for rheumatic diseases are not considered medically necessary
 - Autoantibody panel testing for RA not meeting the criteria as indicated in this policy is considered experimental/investigational and therefore non-covered because the safety and/or effectiveness of this service cannot be established by the available published peer-reviewed literature.
 - The measurement of anti-CCP antibodies not meeting the criteria as indicated in this policy are considered not medically necessary.
 - The following procedures/tests are considered experimental and investigational because their effectiveness has not been established (not an all-inclusive list):
 - Anti-CEP-1 IgG and anti-Sa IgG for evaluation of inflammatory polyarthropathy
 - Anti-mutated citrullinated vimentin (MCV) antibodies
 - Avise CTD assay, Avise SLE, and Avise SLE+ tests for ANA-positive individuals referred to a rheumatologist for the differential diagnosis of systemic lupus erythematosus (SLE) versus other connective tissue diseases (CTDs)
 - Avise MTX (formerly Avise PG) to monitor methotrexate levels in rheumatoid arthritis
 - Avise SLE Monitor Test to follow disease activity of SLE
 - Cytokine IL-10 -1082 G/A, -592 C/A, and -819 C/T gene polymorphisms for juvenile RA
 - Evaluation of telomere length for risk of development of RA
 - Measurements of anti-carbamylated protein (anti-CarP) antibodies, PAD4 , and peripheral T-cells as biomarkers for RA
 - Measurement of circulating insulin-like growth factor-1 (IGF-1) levels for management of RA
 - Measurement of isoforms of 14-3-3 protein (beta, gamma, epsilon, eta, sigma, theta, and zeta) as biomarkers of osteoarthritis and RA
 - SLE-key Rule Out Test to rule out a diagnosis of SLE
 - Vectra DA test for RA and other indications.

3. Post-payment Audit Statement

The medical record must include documentation that reflects the medical necessity criteria and is subject to audit by Highmark WholecareSM at any time pursuant to the terms of your provider agreement.

4. Place of Service

Selected testing for rheumatic disease is typically an outpatient procedure which is only eligible for coverage as an inpatient procedure in special circumstances, including, but not limited to, the presence of a co-morbid condition that would require monitoring in a more controlled environment such as the inpatient setting.

Governing Bodies Approval

CLIA

The selected tests for rheumatic diseases are offered as laboratory-developed tests under Clinical Laboratory Improvement Amendments (CLIA) licensed laboratories. Clinical laboratories may develop and validate tests in-house and market them as a laboratory service; laboratories offering such tests as a clinical service must meet general regulatory standards of CLIA and must be licensed by CLIA for high complexity testing.

CMS

The Centers for Medicare and Medicaid Services (CMS) has no published guidance on this topic.
